linkedin.com/in/balwant-singh-2366a6188 | github.com/balwant2711

CAREER OBJECTIVE

Motivated **Junior DevOps & Technical Support Engineer** with hands-on expertise in **cloud monitoring**, **network operations**, **Linux administration**, and **incident lifecycle management**. Proven operational experience utilizing enterprise monitoring and ticketing tools (**OTS**, **ENM Tool**, **Huawei U2020**) with direct stakeholder communication via **Genesys**. Currently pursuing an **MBA in Information Technology** to bridge technical engineering with business operations. Seeking an entry-level technical support or cloud operations role to deliver high service uptime, fast incident resolution, and exceptional customer satisfaction (**CSAT**).

TECHNICAL SKILLS

- **Cloud Platforms: AWS** (EC2, VPC, S3, IAM, CloudWatch, Route 53, ALB, Security Groups), **Microsoft Azure** (VMs, VNet, NSG, Storage)
- **DevOps & IaC: Terraform** (Infrastructure as Code), **Docker**, Basic **Kubernetes**, **Git/GitHub**, **CI/CD Workflow Concepts**
- **Linux & Operations: Linux Administration** (Ubuntu, Amazon Linux), **Shell/Bash Scripting**, Process & Service Management, **System Troubleshooting**
- **Monitoring & Support: ENM Tool**, **Huawei U2020**, **OUA Tool**, **One Ticketing System (OTS)**, **AWS CloudWatch**, **Incident Ticketing**, **Operations Handover**, Log Analysis, **SLA/SLO Tracking**, **Genesys Communication**
- **Networking & Security: TCP/IP**, **DNS**, Subnetting, Public/Private IPs, Routing Tables, **SSH**, **IAM Policies**, **Security Groups**

PROFESSIONAL EXPERIENCE

Trainee - Business & Network Operations | Infinite Computer Solutions

August 2026 – September 2026 | Noida, India

- Performed real-time network and cloud service monitoring using enterprise tools including **ENM Tool**, **Huawei U2020**, and **OUA Tool** to maintain high network availability and service uptime.
- Managed end-to-end incident ticketing using **OTS (One Ticketing System)**, manually creating, updating, tracking, and resolving operational tickets following defined SOPs.
- Monitored and supported mobile domain-based sites catering to the **Liberty Caribbean market (FLOW - English Market)**.
- Prepared **Zero Availability Reports** and daily operational handover reports with **100% status accuracy** for seamless team escalation and tracking.
- Interacted directly with client stakeholders via **Genesys communication tools** to provide timely incident updates, clarify technical issues, and maintain high **CSAT**.
- Participated in cross-functional forums to share operational feedback and process improvement recommendations.

Cloud & Linux Intern | CETPA Infotech

August 2025 – January 2026 | Noida, India

- Gained practical experience with key AWS core services, including **EC2, IAM, S3, VPC, Route Tables, Internet Gateways, NAT Gateways**, and **Security Groups**.
- Administered **Linux servers** via SSH, managing users, file permissions, processes, service configurations, and routine system troubleshooting.
- Configured cloud networking components (public/private subnets, security rules, and DNS) to ensure secure, reliable cloud connectivity.

- Used **Git and GitHub** for version control across repositories, gaining practical familiarity with **Terraform for IaC** and **Docker** container basics.

Computer Instructor | Technical Institute

2019 – 2022

- Instructed **200+ students** on computer networking, operating systems, and basic programming through 40+ hands-on technical lab sessions.
- Provided technical troubleshooting, system maintenance, lab setup support, and comprehensive documentation.

PRACTICAL CLOUD & DEVOPS PROJECTS

1. AWS Infrastructure Automation using Terraform | *Tech Stack: Terraform, AWS (EC2, VPC, S3, IAM, ALB, Security Groups)*

- Designed modular **Terraform IaC scripts** to automate repeatable deployment of custom AWS VPCs, subnets, and EC2 instances.
- Configured **IAM policies, Application Load Balancers (ALB)**, and **S3 buckets** with strict security rules.
- Utilized standard **terraform init, plan, apply, and destroy** execution workflows for efficient infrastructure lifecycle management.

2. Azure VNet Architecture & Linux Web Server Hosting | *Tech Stack: Azure VNet, Azure VMs, NSG, Linux (Ubuntu), Apache/Nginx*

- Configured custom **Azure Virtual Networks (VNets)** with public subnets, Route Tables, and Network Security Groups (NSGs).
- Deployed Ubuntu Linux VMs on Azure to host web servers (Apache/Nginx) with secured SSH and HTTP access.
- Executed network diagnostics and connectivity validation using command-line tools like **curl, ping, traceroute, and nslookup**.

EDUCATION

- **Master of Business Administration (MBA) - Information Technology** | Amity University Online (2026 – 2028)
- **Bachelor of Technology (B. Tech) - Computer Science & Engineering** | Dr CV Raman University (CGPA: 8.00 | 2022 – 2026)
- **Bachelor of Computer Applications (BCA) - Cloud & Security** | Amity University Online (CGPA: 8.33 | 2022 – 2025)

CERTIFICATIONS & KEY STRENGTHS

- **Certifications in Progress: AWS Certified Solutions Architect - Associate (In Prep)** | **Microsoft Azure Fundamentals AZ-900 (In Prep)**
- **Key Strengths: Incident Escalation**, **Cloud & Telecom Troubleshooting**, **Technical Documentation**, **Network & System Monitoring**, **SLA Management**, **Team Collaboration**
